SCOOTER DRIVE LINE RELATED PARTS

CYGNUS GRYPHUS

**STRONGER by 15%!
IMPROVES ACCELERATION
CHARACTERISTICS!!**

By strengthening the spring, the WPC clutch center spring promotes the shift of the pulley in the torque band, and quickly and forcefully returns the pulley, which was in a high ratio state until then, to a low ratio when decelerating from deceleration to sudden acceleration, on a slope, you can get sharp shifting characteristics.

WPC CLUTCH CENTER SPRING
