

# GREAT COST PERFORMANCE!!

## 6V/12V MONKEY TYPE MOTOR 88/108cc STANDARD BIG BORE KIT TYPE 2 NEWLY RELEASED!

INCREASES HEAT RADIATION PERFORMANCE  
WITH NEWLY ADDED FINNS.

Making the inside wall surface smaller, flame propagation becomes shorter which improves volumetric efficiency. Standard big bore cylinder head type 2 has hemisphere shape, cross-flow type combustion chamber & fillet fins for intake/exhaust flow efficiency.

### SE ROCKER ARM & HIGH CAMSHAFT

14% more lightweight and high durability rocker arm. Follows high revolution at high rpm range.

High lift camshaft developed only for standard cylinder head. Power increases from low to high speed range.

### CRANKSHAFT (108cc 51mm STROKE)

Long stroke crankshaft for bigger displacement Without sacrificing torque at low speed range, power & response increases at high rpm range.
