## HOW TO STICK

※Check where to stick the film before doing it.

- 1)Clean the dust, grease content from meter surface.
  - 2)Remove release sheet on the back side (sticking side) of the meter film. (Be careful not to stain finger prints and oil content). For smooth installation, follow a step below to hold the film easily.
- \* Lift the film by sticking a tag that made by masking tape, etc. ( Do not stick to sticking side )
- 3)Match the meter panel left side shape or corner, then stick it slowly and lightly.
- ※It sticks itself, therefore put on the meter panel and stick automatically to some extent.  
※Do not try to stick again and again.

**Apply the tag tape to the film and peel it off from the release sheet one by one.**

## \* HOW TO RESTICK / PEEL

Make a tag by tape to surface to ease to lift film not to add finger print, etc.

### ● HOW TO DISCHARGE AIR BUBBLE

- 4)After sticking, slide soft cloth from center to outer for discharge remaining air bubble. Finally, please hold down the edge (dotted line) as same.

**【ATTENTION】** Be careful not to hold down with hard thing, it cause break, scratch, etc..

- 5)After sticking, do not touch until a half to one day to be completely stuck.

According to size of air bubble, it may not remove perfectly.  
The limit is to be inconspicuous.
