1) Clean the dust, grease and wax from installation surface.

● HOW TO STICK STICKER

2) Match to the fuel tank shape, then stick it slowly and lightly following instruction below.

○ HOW TO STICK STICKER : WATER STICK (WET STICK)

Spray water with a little neutral detergent to body (fuel tank cap) sticking surface and sticker sticking surface. (You can stick without water, but when stick again, it might break or become less cohesive.)

○ HOW TO STICK STICKER : STICK WITHOUT WATER

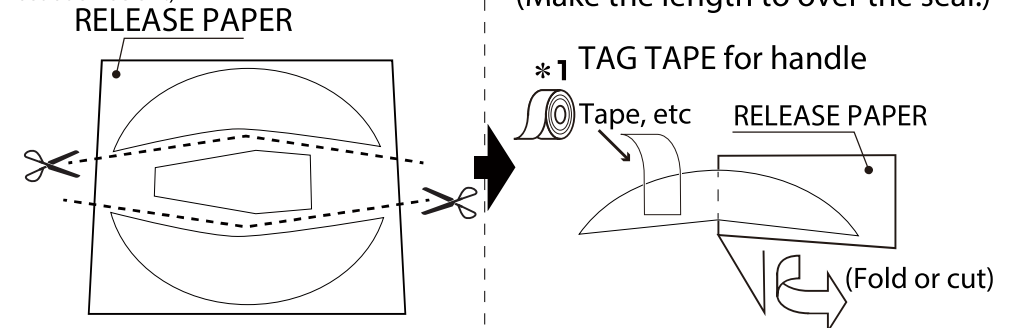

• Cut release paper into 3 of sticker center (pull tab point) and outer side (left and right of cap)※. (Refer to the illustration below.)

• By using tape, etc as illustration, hold edge of tape that out of seal, then install temporarily.

• Peel half of release paper (not all of it), decide where to stick, then stick rest of it with pulling rest of release paper. (Be careful not to apply finger print or grease to surface.)

CUT RELEASE PAPER

Cut release paper into 3 of sticker center (pull tab point) and outer side (left and right of cap)※. (Refer to the illustration below.)

• Make a tag by tape.

(Make the length to over the seal.)

* 1 TAG TAPE for handle

Tape, etc RELEASE PAPER

(Fold or cut)

• Peel half of release sheet and fold or cut it.

* 1, HOW TO STICK STICKER AGAIN
Becomes easy to pull up sticker by using tape tag over the seal.

FRONT

※ Be careful sticking mistake of left and right of cap.

● HOW TO RELEASE AIR BUBBLE

3) When sticking, slide sticker to decide position, stick firmly to release air bubble of the surface to out side.
【ATTENTION! : Be careful not to hold down with hard thing. It cause of break or scratch.】

※ Slide soft cloth from center to outer for release remaining air bubble and stick firmly. (According to size of air bubble, it may not release perfectly. The limit is to be inconspicuous.)

4) After sticking, do not touch until a half to one day to be completely stuck.
